

Magnetic Resonance Research Center
University of Pittsburgh
MRRC 004: Adverse Findings

PURPOSE:

The purpose of this Standard Operating Procedure document is to outline policy related to adverse findings during an MRI session at the Magnetic Resonance Research Center.

POLICY:

During the MRI session, if the MRI technologist notices an adverse finding, the relevant scan is uploaded to UPMC's clinical PACS system for review by a clinical radiologist within the Department of Radiology. The study's Principal Investigator is notified and provided a summary of findings. It is the responsibility of the Principal Investigator to notify the research participant of the findings.
